18	1-May	3	Rest or Cross	3	Rest	2	Rest	Flying Pig	34.2

General Advice

Long Runs: Saturday mornings will be our long runs. Our long runs get progressively longer; however, we drop back every so often. Do not skip your long run on Saturdays. This will be key to finishing a marathon. Run slower on these runs. We recommend about 45 seconds slower than marathon pace.

Hill Training: Hill repeats make you stronger and faster.

Interval Training: This will help increase your aerobic capacity and overall speed

Heart Mini Half Marathon: This should be run at Marathon race pace.

Example: If you plan to run your marathon in 4:30; this equals a 10:18 pace. Run this race at a 10:18 pace.

Cross Training: We recommend that you do some aerobic activity that is less impactful to the body; such as cycling and swimming.

We also recommend that you use this time to do some core work.
